The present sequence encodes a polypeptide which has kinase activity. The kinase polynucleotides can be used to express the polypeptides, and as probes to identify nucleic acids encoding proteins having kinase activity. The kinase polypeptides and fragmented polypeptides are used as molecular weight and isoelectric focusing markers, and as controls for peptide fragmentation. They also have a number of therapeutic uses as kinases play a central role in cellular signal transduction. The polypeptides could also be used to identify binding partner proteins. The polypeptides can also be used as a reagent to identify any proteins that the polypeptide regulates, and proteins with which it might interact. The polypeptides may also be used for preparation of antibodies. The antibodies can be used in assays to detect the presence of the protein, and to purify the protein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     3003

The invention describes an isolated nucleic acid molecule (I) encoding a novel central nervous system protein. (I) and polypeptides (III) encoded (by (I), are used to treat a medical conditions and in diagnosis of a pathological condition. Disorders which are diagnosed or treated include autoimmune diseases e.g. rheumatoid arthritis, hyperproliferative disorders e.g. neoplasms of the breast or liver, cardiovascular disorders e.g. cardiac arrest, cerebrovascular disorders e.g. cardiac arrest, cerebrovascular disorders e.g. cardiac arrest, cerebrovascular disorders e.g. anjoquenesis, nervous system disorders e.g. Alzheimer's disease and amylotrophic lateral sclerosis, infections caused by bacteria, viruses c.g. Acquired immunodeficiency virus (AIDS) and fungi, ocular disorders e.g. denocarcinomas and irritable bowel syndrome, reproductive system disorders e.g. testicular feminisation, endocrine disorders e.g. diabetes and pituitary dwarfism, cancers and disorders at the cellular level e.g. leukamia, disorders involving neovascularisation e.g. malignancies, crespiratory disorders e.g. nonallargic rhinitis, renal disorders e.g. malignancies, crespiratory disorders en also be used to aid wound healing and ceptrhellal cell proliferation, to prevent skin aging due to subburn, to maintain organs before transplantation, for supporting cell culture of primary tissues, to respectate tissues and in chemotaxis. The
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         primary tissues, to regenerate tissues and in chemotaxis. The polypeptides can also be used as a food additive or preservative to increase or decrease storage capabilities, fat content, lipid, protein,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            3221 AAGATGGACAAGAGCATGTTCGTCAAACTGAAGCCCATTGGAGTGGGTGCATTTGGCGAG 3280

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1354 AACAAGAAAGATGAAGAACGAAGAGAGTCTCGGATTCAGAGTTACTCCCCACAGGCCTTT 1413
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        3044 AAGTICITCAIGGAGCAGCACATAGAGAACGIGATCAAGTCGIAICGCCAGCGCACGTAT 3103
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           This sequence encodes a mouse large tumour suppressor m-lats protein, and has been isolated from a newborn mouse brain phage lambda-ZAP CDNA library using a 2.2-kb DNA probe from the Drosophila lats gene (AAT4117). A homologous mouse sequence has also been isolated (m-lats2, AAT42120). The gene encodes a putative protein-serine/threonine-kinase, and inhibits cell proliferation and plays a crucial role throughout development. Activators or inhibitors of lats function (e.g. an antisense oligonucleotide or dominant-negative lats fragment) may be used in therapy of cancer or other proliferative disorders, degenerative disorders, trauma, growth
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 deficiency, etc., and fragments of the gene may be used as diagnostic probes. A lats-inhibitor sequence may be expressed in a transgenic plant or farm animal to confer increased growth and inhibit
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        e - used to develop prods
enhancing proliferation

The present sequence is a DNA encoding mouse Lats (large tumour suppressor) protein which is a cell overproliferation inhibitor and a negative regulator of cell cycle-dependent kinase do2/Cyclin A. The present sequence is useful for treating cancer that is refractory to standard chemotherapy or radiation therapy such as hyperplasia, to syplasia, and disorders associated with aberrant levels of cdc2 activity. Conditions treated by promoting cdc2 function include degenerative disorders, growth deficiencies, hypoproliferative disorders, physical trauma, lesions, and wounds. An animal model preferably a mouse, in which a lats gene has been disrupted by homologous recombination, e.g. a lats knock-out mouse, is used for screening compounds that can be used to treat or prevent cancer, particularly
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Use of lats proteins, complexes of lats and cdc2 for treating cancer that is refractory to treatment by standard chemotherapy and radiation therapy, and disorders associated with aberrant levels of cdc2 activity

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```
library was prepared. The library DNA was normalized by method #4 from Bonaldo, Lennon, and Soares 1996 Genome Research 6:791-806; 0.5 microgram single-stranded library plasmid DNA was mixed with 5 micrograms PCR product representing library inserts and hybridized to an Ecot of SO. Single-stranded (unhybridized) plasmids were isolated by hydroxyapatite chromatography and used to make this library."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                bp mRNA linear EST 05-MAR-2002

lactis var. lactis, Kluyeromyces marxianus var. marxianus, prichia angusta, Debaryomyces hansenii var. hansenii, Pichia sorbitophila, Candida tropicalis and Yarrowia lipolytica. Genomic inserts of 3 to 5 kb were prepared and both extremities were sequenced. See theywords for description of this sequence and for the sequence of the other extremity of this insert.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         This GSS is part of a remove sequencing program of thirteen yeast species: Saccharomyces bayanus var. uvarum, Saccharomyces exiguus, Saccharomyces servazzii, Zygosaccharomyces rouxii,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Saccharomyces kluyveri, Kluyveromyces thermotolerans, Kluyveromyces
